

Just back in the forest, these properties benefit from a great central sun-soaked meadow that hosts several trail junctions and shared garden plots. The perfect balance of privacy and community makes The Meadows ideal for a life of outdoor activity and neighbourly connections.

Lot # 29 reveals itself as you pass up the driveway to the centre of the property. To the west, the garden meadow is visible below while to the east, the morning sun warms the home site. On a natural promontory, Lot # 29 could lend itself to an interesting architectural design. The natural topography will offer you 360° of privacy around your home.

29
